valid as of **september 1st 2024**

Kortsystem

At Kortsystem we work with labelling systems in four different product areas: warehouse, production, retail and industri. We develop and manufacture all of our products in Gislaved. These consist of labels, signs and holders that we sell primarily in Northern Europe.

Kortsystem aims to be consistently associated with high quality, at all stages of the customer relationship. We do this by constantly improving our internal processes so that we always fulfil our customer's requirements.

We also believe that a high level of involvement in the process as well as a high level of service contribute greatly to our ability to deliver projects on time, at the right price and quality.

Terms and conditions

- All prices are net and ex works.
- Payments terms are 20 days net from invoice date.
- Any complaints has to be made within 8 days of receiving the goods.
- Any returns needs to be approved by Kortsystem.
- Product and price subject to change.

Product information

The dimensions that are used in our articles describes the size of the appropriate label, the label holder dimensions are not given in the article name.

More information about our products can be found on our website where you also can order samples of our products.

You are always welcome to contact us at Kortsystem.

Label holders

When choosing a label holder, readability, working methods, ergonomics and the environment are important. Our holders are available in multiple sizes, flat or angled, open or protected, can be obtained with self-adhesive tape, magnet or self-adhesive foam and are adapted to the markets various pallet rackings, shelf profiles, poles/posts, plastic trays, etc.

Products listed in our price list are standard sizes and are available for immediate delivery in most cases. As Kortsystem is a manufacturing company, it is possible to get other sizes than standard. Contact us if you are interested and want more information.

Our label holders are manufactured from a clear transparent APET that is 0.5 mm in thickness

- Withstands temperatures up to 70°C
- High chemical resistance
- Abrasion resistance
- Bendable
- Suitable for direct contact with food
- Not flammable

Our double-sided self-adhesive tape (illustrated in red ) is a permanent acrylic with an adhesive strength of 20 N/10 mm. The thickness is 205 µ.

Our magnetic tape (illustrated with gray ) is isotropic with a magnetic strength of 75 g/cm². The thickness is 1500 µ.

Our foam self-adhesive tape (illustrated with blue ) is reinforced modified acrylic with an adhesive strength of 6 N / 10 mm. The thickness is 1100 µ and has a carrier consisting of PE foam.

To clarify form and function, we have illustrations that exaggerates its thickness. This should give a clear indication of differences between different holders and which functions they provide. The dimensions given in our products describe the size of the label that the holder fits and not the physical dimensions of the holder.

Example of EBA/EBB as a closed holder to protect the label completely. Good for a more permanent installations as well protection against dust and liquid spills.

Opposite holder is SBA/SBB which is an open front and shorter back and facilitates label changing. Good for a fluid flow in a warehouse/store where information needs to be exchanged more often.

As standard, Kortsystem has two different angles on our label holders, 27 or 45 degrees. Perfect for angled profiles. If a rack is very high, you can choose an even greater angle, 72 degrees, the holder then tilts more and increases the readability.

We also sell cardboard paper that fits all our standard holders, printed or unprinted. More information about these can be found on page 19

EH & EHB

With open top for easy label mounting

≡ 50 pcs/pack
■ EH - Self-adhesive

Assorted complement

Sometimes it is difficult to find a good basis for attaching the label systems.
Examples of such surfaces are cantilevers, wire jaws, narrow surfaces, etc.

OK

OK consists of various products that help your holder to attach to difficult surfaces

≡ Price per unit
△ Bracket only, need to complete with a label holder

- OKG - Adapted to cantilevers
- OKH - Different types of hinges made of plastic
- OKT - Adapted to wire shelf/ceiling/wall
- OKS - Different suspension systems

OKG

Labels

We have a wide range for marking shelves and pallet racks with labels. Our labels use three types of material; cardboard paper, magnetic mat and self-adhesive vinyl.

With our own printer machines, we take responsibility for the entire production, so the label is delivered ready for installation.

Cardboard (KLP, KP, TE) is a strong paper label with a weight of 160 g / m².

We have both printed and unprinted cardboard paper labels. The printed one are delivered according to the customer's wishes, sorted and cut to the desired size and fits our label holders.

We can also deliver the cardboard label mounted in the selected holder, this facilitates the installation for your warehouse.

Unprinted labels comes in a perforated sheet that can be printed on a regular printer, then torn at the perforation to get the correct label size. Unprinted can be obtained as A3, A4 sheets or strips. Cardboard paper has no adhesive ability but is normally used together with our label holders.

Magnetic mat (GEM) consists of a permanently attached vinyl on a magnetic soft mat with a thickness of 1500 μ . The magnet is isotropic with a magnetic strength of 75 g/cm².

Our magnetic mat attaches perfectly to steel beams/pallet racks or shelves. An excellent choice if you want removable markings or labels that do not leave adhesive residues or other marks.

Our magnetic labels are printed in the same way as our vinyl labels (see below) and have the same type of durability and guarantees.

Vinyl labels is our biggest product of pre-printed labels. We have many vinyl labels types where the biggest difference between the types is the self-adhesive backing.

- GE - Our standard label, has permanent adhesive, durable and long life.
- GER - Label with semi-permanent adhesive, allowed to be removed or moved several times.
- GEF - Adhesive is freeze-resistant, can be installed in colder temperatures and withstand freezing.
- RME - The adhesive is for low energy surfaces, eg; fatty plastic, cardboard and wood.
- FM - Floor label is a printed GE with a laminated surface with a durable and anti-slip material.
- FMR - A removable floor marking, it is basically a GER laminated like FM.
- FMA - For asphalt, the adhesive is specially adapted and more sticky which works well on asphalt, it's also laminated.

Through a wide range of different colors, shapes, symbols and barcodes on the label, it is possible to get a uniform marking that suits your business optimally.

Advice for optimal installation results of vinyl labels;

- *Clean the surface with Surface Cleaner (see page 56) to counteract dirt and grease.*
- *The substrate must be dry and at least +10° C (does not apply to GEF which can handle -5° C).*
- *Press the entire adhesive surface against the substrate during installation.*
- *Permanent labels have a curing time of approx. 24 hours.*
- *It must be a smooth surface, eg; metal, glass or treated concrete (doesn't apply to RME).*
- *If the surface is porous/greasy/matte/textured, e.g.; wood, raw concrete, asphalt or fat plaster, we have special labels that fit those surfaces (see the list above).*

Kortsystem is a manufacturing company, we produce all our products in-house. If our standard product does not fit, you can always contact us directly and then we can help to produce a something that suits your needs. Examples of this are if you need a specific RAL/PMS/CMYK colour code as a background, a unique font or special dimensions/shape of the marking.

KLP

Perforated A4 sheet when you want to print the information yourself

- ≡ Price per sheet
- △ Perforated cardboard (160 g/m²)

Available in multiple colours (A4/A3-sheet).

How do I order a sample?

Very simple!

- Step 1 - Go to our website: <https://www.kortsystem.se>
- Step 2 - Go to the page where the product is located
- Step 3 - Select product, click the green button "Get a sample"

Done!

Signs

Kortsystem manufactures a wide range of signs. We have a good experience of how large the signs and their information should be for good readability at a given distance.

The traditional sign is a printed vinyl permanently mounted on a transparent sheet of plastic. As standard, the sign has a flap with self-adhesive tape. Single-sided or double-sided.

With this as a starting point, there are several customizations and features to get the perfect sign. You can get it;

- with hard plastic or aluminum for better durability/outdoors (GEP, GEA)
- with a 90° angle, the sign sticks out in the aisle for better visibility (add-on GES V-90)
- with holes in each corner - to be screwed to the wall or hung (included with GEP, GEA)
- with self-adhesive foam tape for uneven surfaces (add-on GES-F)
- with magnets for easier movement/exchange (add-on GES-M)
- with angle 45° and angled list VL you can create a plow sign (2 pcs GES, VL and add-on V45)
- unprinted flat or angled signs to attach own label (SK, GS)
- without print. Order separate marking for your own installation (T-sign, GE)
- as a holder where you can insert your own cardboard label in A-format (GBA/GBB)
- as a post/rack sign or as a printed angled holder for pallet racking (GES-Stolpe, TVA)
- as a large four-sided sign to hang from the warehouse ceiling (GET)

If you cannot find your sign solution, contact us and we will help you.

The lifespan of our signs outdoors where it is exposed to sun, wind and rain is 5 to 7 years.

In an indoor warehouse, the lifespan of a printed sign is a very long time - so long that we don't know the answer.

GES

Assembled aisle signs with long durability

- ≡ Price per unit
- △ Single or double sided assembly
- Self-adhesive
- Available in multiple colours

Standard for all aisle signs is straight, left-hung and with self-adhesive tape. For angled or magnetic is add-ons. For the right-hung one, it must be in spec.

Single-sided (-1) have adhesive on the back

Information holders

Our information holders can be used in several areas - the common thing is that they highlight the message and thereby increase the value of what you want to say.

The advantage of an information holder is that it protects the message from dust and dirt, keeps it neatly in place while still easy to change information.

Similar to other products that we manufacture, our information holders have adaptations and features for just the right use.

You can get an information holder with a magnet so it is removable, or with self-adhesive foam tape for a more permanent installation.

We have information holders with a coloured frame. Colour coding is a good aid to ensure that the information reaches the right recipient.

Our holders with coloured frames are available in several designs, for floors, for boards and so on.

Our holders are also available with a coloured frame and open front, great for documents to write directly on without the need to remove the paper/information.

We also have signs holders where the information is interchangeable and excellent for warehouse aisles where the information constantly changes with the flow.

Our information holders can be found in offices, in stores, in warehouses and in production environments.

| KPP 145-75-0,5 Y | 6,17 | 4,57 | 4,04 | 3,51 | 2,98 |

Card holders

In order to easily mark the contents of pallets with collars, we offer a number of different holders. Our card holders are made of transparent plastic, which makes them very durable and easy to handle when changing the information frequently.

If you want to facilitate the exchange of information or make notes about completed work, a card holder with an open front works best (KPB).

If you want to protect the information from dirt and dust, a closed holder works best. To make it easier to change labels, there is a thumb grip on its back (KPS).

If a longer durability of the card holder is required, it is available in thicker material (KPA).

If you have a larger area with pallets, the pallet collar markings needs to be lifted up for better readability and overview. Our card holder in vertical design fits here (KPC).

Within 5S/lean, colour is used to signal e.g. approved or blocked goods. We have a two coloured pallet collar holder which is reversible to signal a green side or a red side (KPK).

Sometimes you want to protect your contents within pallets with pallet collars from dirt, dust and splashes/spills, this is easily done with a large transparent plastic sheet - available in two sizes for EUR-pallet and EUR-half-pallet (TPL).

With our own production, we have the opportunity to go beyond the standard format and design of the holders. Contact us and we will help you.

KPB

Card holder with open front

- ≡ 50 pcs/pack
- △ For pallet collars
- △ V90 - Has a 90° degree tab for insertions

News

GEF

This year we have some news for our self-adhesive vinyl selection. One of these is vinyl labels for freezers. The label has a custom adhesive that attaches and hardens at a working temperature of -5 degrees celsius. Excellent for mounting on an active freezer.

The product can be viewed on the page 25

RME

Another vinyl news is a label suitable for low-energy surfaces.

Surfaces that have low energy are for example coated matte surfaces, porous surfaces, greasy surfaces and surfaces that our standard vinyl (GE) have difficulty to adhere on permanently. With this vinyl, you can attach the label directly on cardboard, wood, plastic bins and matte/structured powder coating.

The product can be viewed on the page 26

TVA

Not all pallet rack beams are straight/flat, some such as Z-beam or I-beam have angled structure, this means that our vinyl labels do not get the ideal angle for readability.

The solution is TVA, which is a holder that is angled 27 or 45 degrees. Our vinyl is attached to this angled holder and the angle makes the marking readable even at very high heights.

The product can be viewed on the page 41

IBS

A requested product that is based from our IBF product line. This is an information holder for the floor, designed as an arrow and keeps the information permanently in place. Excellent for larger warehouse areas with pallets.

The product can be viewed on the page 47

DS & MS

Menu holders, we have two models;

The L-stand that will get the message up to a readable height.

The T-stand protects and show information from both sides.

The product can be viewed on the page 55
